I also like collage a lot but I'm not submitting any...I'm sort of sick of them right now cause I just made a book of them which was several hundred plus a lot of charcoal and pencil work."

Jacqueline Myers-Cho

www.myerscho.weebly.com

Artist Bio: Jacqueline Myers-Cho, a contemporary artist, creates big and bold figurative works that are walking the line between the conventional notions of painting and illustration. These stylized paintings are painted in a classical way, rendering them fresh and new. "I approach the canvas not so much with a completed painting in my mind as with a feeling," she says. "As the work progresses, I keep asking what needs to be done for it to be better. This process of painting better consumes me into something like a walking meditation, constantly stepping back from and forward to the canvas in order to see better," she adds. From this process emerge glowing figures as if they were stepping forward from the background; some of the edges are soft, others hard; the figures carry the attitudes of spunkiness, aloofness, and regalness. Myers-Cho has been influenced by a number of masters: Henri Matisse for his female figures and his late collage works, Georgia O'Keeffe for her boldness and subtle tones, Rembrandt for his glazed backgrounds and how the figures emerge from them, but she says, "I have also been influenced by two "lowbrow" artists: Mark Ryden for his stylized girls and Joe Sorren for his surreal settings and figures." She has developed a unique style, and her work often contains exaggerated figures with large eyes, a large head, and a long neck. She has one book called "STRANDS: Creating Unexpected Fabrics and Fashionable Projects" published by North Light Books, and has self-published two coloring books: "Jacqueline's Coloring Book Volume 1 and Volume 2 Monsters." She is in the process of publishing another coloring book called "Dogs and Cats." Her works have been collected by fine art collectors from many countries and regions: the U.S., Japan, South Korea, Sweden, Australia, New Zealand, Switzerland, and Italy. She now lives in Los Angeles with her husband.

Jim then started his own business as a freelance artist and formed a partnership in an advertising agency. In 1987 Jim met Bill Brown, the previous ski map illustrator. Winter Park Resort's inset for the back side of Mary Jane became Jim's first ski map illustration. Snow Country Magazine contracted him for resort full spreads.
